**Ultrarail™**  
Newly redesigned, reinforced rail adds design excellence for unsurpassed, superior strength.

## STANDARD COLORS:

Colors shown represent an approximate comparison and may vary slightly to actual fence color.

**POWDER  
COATED  
TOUGH™**

**FINISH:** Polyester TGIC technology advanced powder coating system allows us to produce a high quality, long-lasting finish which is also environmentally friendly. When applied to an Ultra fence, Polyester TGIC is twice the thickness and hardness of a typical acrylic, baked enamel, or "wet paint" finish, making it far more durable, fade-resistant and scratch-resistant than other coatings.

**MATERIALS:** All Ultra Fence components are extruded from 6005-T5 alloy, with a minimum ultimate strength of 35,000 psi. Every fence system is assembled with stainless steel, corrosion resistant screws, with heads painted to match the finish of the fence. Ultra carries posts in a variety of thicknesses, punched to accept the channel on the fence. Accessories are of zinc die cast or cast aluminum. All accessories are fully powder coated.

**GUARANTEE:** Every Ultra fence is guaranteed by our Lifetime Warranty. This guarantee covers our products against defects in workmanship and materials, as well as chipping, peeling, or cracking of the Polyester TGIC finish for as long as you own your fence.
